Content Checked For Plagiarism

The originality of content is very important for one's online reputation. Copied work hurts the author's reputation and could destroy a professional career. Avoiding plagiarism is, therefore, important for all kinds of people; especially those who publish content online. Professional writers have a lot to gain by being extra cautious to guard against plagiarism. One way to do that is to enhance their writing skills and become better at coming up with original content by using professional services such as what is offered on writingcheap.com. As plagiarism becomes a major concern and more people seek to protect their work, different plagiarism checker tools have been availed to help check the originality of content. Here is a list of the top 10 free plagiarism checker tools available today.

1. DupliChecker This online software for detecting plagiarism is absolutely free. It can be used for the single purpose of checking for plagiarism or for multiple other uses. It is very easy to use and convenient, giving instant results (within seconds). It gives the option of either copy pasting or uploading content for assessment. For regular writers, it is advisable to register, which is free. Unregistered users are allowed 1 free search daily while registered users can do up to 50 searches a day.
2. Grammarly This tool is a must-have for writers. It not only helps to fight plagiarism but also supports one to become a better writer. Once it is downloaded onto a computer, it works as long as one is working online. It proofreads entire texts, scans for up to 250 types of grammatical and spelling errors and provides instant results. This can be rated as the best option when it comes to plagiarism checker software with its added advantage of grammar checker features. It is very useful in enhancing a writer's vocabulary and is claimed to instantly improve one's quality of writing. There is the option of either using the free version or the premium version.
